pawsplaysandiego.com

All of us at Paws Play are taking the COVID-19 pandemic seriously. From the beginning we have been researching and learning what we can do to provide the same level of service in a manner that is safe for our team members and our clients.

We are taking the following precautions to ensure your safety:

- Our complimentary initial In-Home Consultation is now done virtually. We can introduce ourselves and get to know you and your pets over Facetime, Zoom or just a phone call. Whatever method of communication you prefer.
- We are requiring Social Distancing from our team members in all of our clients' homes. If you are working from home, we can text you when we're on our way. That way you know when to expect us and can keep a safe distance.
- Our team knows to notify us immediately if they aren't feeling well. We have also asked all clients to do the same.
- We are limiting the surfaces we touch inside our clients' homes and all team members have disinfectant wipes to wipe down any surface they come into contact with. We are also washing our hands between each service.
- All of our team members have their own leashes. We're happy to use whichever harness/collar you provide.
- When we are going to be anywhere among the public, such as apartment complexes and dog parks, our team wears a mask.
- We can also pick up/drop off your pup in your yard or other fully enclosed areas to avoid entering your home all together.

The safety and comfort of our team and our clients is our top priority. If there is a precaution you'd like us to follow that isn't listed above, we're happy to accomodate. Contact us today to begin quality care for your pet!
